CSHL unites with other US cancer centers to urge HPV vaccination

About 79 million Americans are infected with HPV, making the nation’s HPV vaccination rates remain low. To change this, all 69 NCI cancer centers, including ours, have joined forces to send the message that HPV vaccination is cancer prevention.

bioRxiv gets quicker with direct-to-journal submission feature

Created by John Inglis and Richard Soros of CSHL Press, bioRxiv is an online tool that allows scientists to make their findings immediately available to the scientific community. Now, scientists can also use bioRxiv to submit papers directly to journals.
