New leukemia drug acts by disarming a ‘molecular Swiss Army knife’

A promising new drug for acute myeloid leukemia, which took over 10,000 lives in 2015, is in human clinical trials. Chris Valacich and colleagues, who discovered the drug’s effectiveness in AML, just figured out how it disarm cancer cells.

Dr. George Yancopoulos elected to CSHL Board

Dr. George Yancopoulos, Chief Scientific Officer of Regeneron Pharmaceuticals, Inc. and President of Regeneron Laboratories, has been elected to CSHL’s Board of Trustees. A scientist, clinician and industry leader, Yancopoulos brings a well-rounded perspective.
