

CSHL Undergraduate Research Program Participants 1959 - 2017

URP name	University	Advisor	Research Project
1959			
David Baltimore	Swarthmore College	A. Chovnick	Physiological genetics of Drosophila and Neurospora
Sandra Edwards	Goucher College	M. Demerec	Bacterial genetics
Frederick Gilman	Michigan State University	H. Gay	Electron microscopy and cytogenetics
Lucie Hicks	Mount Holyoke College	P.E. Hartman	Bacterial genetics
Nancy Metnick	Rutgers University	R.D. Hotchkiss	Pneumococcus transformation
Samuel Piel	Harvard University	B.P. Kaufmann	Electron microscopy and cytogenetics
Robert Reinhold	Johns Hopkins University	S.E. Luria	Genetics of bacteriophage
Philip Shambaugh	Princeton University	P. Margolin	Bacterial genetics
George Trager	Cornell University	H. Moser	Tissue culture of normal and malignant mammalian cells
Carole Weisbrot	Brooklyn College	G. Streisinger	Genetics of bacteriophage viruses
1960			
Philip Colbert	Wesleyan University	B.P. Kaufmann	Effect of deoxyribonuclease in Drosophila
Carol Dressel	Michigan State University	A. Chovnick	Studies of a complex locus in Drosophila
Kay L. Fields	Radcliffe College	P. Margolin	Variation in transduction frequency in S. typhimurium
Steven Jaffe	Johns Hopkins University	R. Franklin	Chromosomal variation in normal and tumorous lines of mouse cells grown in vitro
Charles Laird	University of Oregon	P. Margolin	Mechanism of gene incorporation through transduction in S. typhimurium
Marlene Martin	Rutgers University	A. Schalet	Development of selective procedures for recombination studies in Drosophila
Frances Messik	Alfred University	B.P. Kaufmann	Effect of infrared irradiation on recombination in Drosophila
June Rothman	Swarthmore College	M. Fox	Cross-feeding between mutant and wild-type cells of E. coli
1961			
Marietta Cassle	Indiana University	B.P. Kaufmann	Study of chromosomes in human blood cells
Gail Choder	University of Pittsburgh	E. Englesberg	Glucose effect in E. coli
Ronald Garren	Dartmouth College	A. Sokoloff	Genetic studies of eye pigment formation in several beetle species
Alfred Goldberg	Harvard University	A. Schalet	A possible synthetic lethal in Drosophila
Frances Messik	Cornell University	P. Margolin	Complementation studies of induced auxotrophs in S. typhimurium
Kirsten Olsen	Wells College	B.P. Kaufmann	Studies on DNA in Drosophila
Alan Rein	Reed College	A. Chovnick	Maternal effects in Drosophila
Jonathan Rosner	Swarthmore College	R. Franklin	Autoradiographic studies of RNA synthesis in mouse L-cells infected with mengovirus
John Roth	Harvard University	F. Mukai	Studies of chemical mutagenesis in S. typhimurium
1962			
Linda Brody	Pembroke College	R.M. Franklin	Analysis of nucleic acid hydrolyzates by thin layer chromatography
Claire Dryfuss	Douglas College	A. Schalet	Development of techniques for a microbial genetics course
John Farber	Reed College	M. Fox	Genetic analysis of adenine linkage groups in B. subtilis
Barbara Furman	Cornell University	A. Chovnick	Fine structure of the rosy cistron in Drosophila
Agnes Harford	Radcliffe College	M. Fox	Effect of 1-methyl-3-nitro-1 nitroso compounds on the transforming principle of B. subtilis
Lawrence Kadish	Princeton University	A.B. Pardee	Photodynamic inactivation of genetic material
Robert Pollet	Columbia University	H.E. Umbarger	Hydrolysis of dipeptides by S. typhimurium extracts
Barry Rosen	Massachusetts Institute of Technology	H.E. Umbarger	Control of biosynthetic enzymes
Jeff Siegel	Reed College	P. Margolin	Fine structure of the leucine region of the chromosome of S. typhimurium
Charles Wahl	Columbia University	H.E. Umbarger	Genetic and environmental control of L-serine biosynthesis in S. typhimurium
1963			
Wayne Diamond	University of Pennsylvania	S. Goodgal	Physical properties of H. influenza bacteriophage
Claire Dryfuss	Douglas College	P. Margolin	Deletion mutations in S. typhimurium
Alan Finesilver	University of Rochester	T. August	Search for a natural pol adenylate in E. coli
Edward Hackney	Duke University	S.R. Gross	Fluoroleucine-resistant mutants of Neurospora crassa
Michael Murray	Bellarmino College	R.O. Burns	Isomerase enzyme in leucine biosynthesis in S. typhimurium
Rita Rothenberg	Mount Holyoke College	E. Goldberg	Infection of spheroplasts with T4 DNA
Susan Singer	Vassar College	M. Freundlich	Aspartokinase in salmonella
Lewis Jacobson	Amherst College	I.C. Gunsalus	Camphor-fermenting pseudomonads
Kathryn Treible	Lycoming College	G. Mosig	Heavy T4 bacteriophage
Mary Robbins	University of California	J. Gots	Zygotoc induction
1964			
Rosina Berry	Radcliffe College	R.S. Edgar	Isolation of new T-phage types and their characterization
Seth Braunstein	Princeton University	S.R. Gross	Isolation of leucine auxotrophs of B. subtilis for transformation experiment
Eric Brondfield	Harvard University	R.S. Edgar	Characterization of "Azure" mutants of phage T4

CSHL Undergraduate Research Program Participants 1959 - 2017

URP name	University	Advisor	Research Project
Barbara Bund	Radcliffe College	S. Goodgal	Production by mutagens of temperature-sensitive mutants of H. influenza
Ann Gunsalus	Hiram College	C.I. Davern	Production by fluorouracil of temperature-sensitive mutants of an RNA phage
Jack Michalka	Philadelphia College	S. Goodgal	Production of a defined medium for growth of H. influenza for transformation experiments
Ethel Noland	Radcliffe College	I.C. Gunsalus	Transduction of camphor resistance by a pseudomonas phage
Henry Smilowitz	Reed College	P. Margolin	Studies on leucine-permease mutants in S. typhimurium
Kathryn Treible	Lycoming College	G. Mosig	Studies on complementation by amber mutants of T4 phage
Paul Wolfowitz	Cornell University	E. Goldberg	Kinetics of uptake of T4 DNA by spheroplasts
1967			
Douglas Brown	Bellarmine College	D. Denhardt	Phage Ø/X174
Judith Cohen	Columbia University	R. Novick	Staphylococcal RTF
Geoffrey Cooper	Massachusetts Institute of Technology	M. Fox	Transcription and recombination
Palma Longo	St. Bonaventure University	J. Speyer	Genetic suppression
Michael Lovett	Yale University	S. Goodgal	Bacterial transformation
Michael McLeod	California Institute of Technology	M. Delbrück	Albino phycomyces
Gerald Rosen	Cornell University	M. Fox	Bacteriophage recombination
Robert Steinberg	Harvard University	J. Cairns	DNA transfer
Jill Steinhardt	Goucher College	S. Colowick	Bacteriophage rII function
Peter Wayne	Harvard University	C.I. Davern	DNA synthesis
1968			
Michael Brandt	Williams College	R. Hendrix	Proteins in lambda cIII deletion mutants
Maryann Brunstetter	University of California	K. Manly	Isolation of phage lambda cIII deletion mutants
Stephen Dennis	Massachusetts Institute of Technology	R. Werner	DNA replication
Michael Farber	California Institute of Technology	P. Spahr	Molecular weight determination on R17 RNA fragments
Lynn Greenwald	Cornell University	J. Marmur	B. subtilis SP02 prophage
Palma Longo	St. Bonaventure University	R.F. Gesteland	In vitro protein synthesis
Michael Lovett	Yale University	S. Goodgal	DNA-negative mutants of H. influenza
William Meadow	Amherst College	J. Marmur	B. subtilis SP02
Donald Syracuse	Dartmouth College	J.T. August	Isolation of phage QB amber mutants
Peter Wayne	Harvard University	J. Cairns	DNA replication
1969			
Josephine Bowen	University of Notre Dame	R. Werner	Intergenic suppression of T4 ligase mutations
Stephen Dennis	Massachusetts Institute of Technology	R. Werner	Replication of T4 mutants defective in gene 32
Charles Gilbert	Amherst College	R.F. Gesteland	Nucleotide sequence of phage R17 RNA
John F. King	Harvard University	J.D. Watson	Isolation of UGA mutants in phage R17
David N. Kuhn	Massachusetts Institute of Technology	J. Cairns	Phosphate precursor pools of DNA
Sondra Lazarowitz	Massachusetts Institute of Technology	R. Webster	Mechanism of killing of E. coli K38 infected with amber mutants of phage P1
Michael Link	Columbia University	J. Marmur	Isolation of conditional lethal mutants in phage SP02
Palma Longo	St. Bonaventure University	R.F. Gesteland	In vitro synthesis of phage T4 glucosyl transferase
Patricia Stanley	Cornell University	J. Davies	Difference between cytoplasmic and mitochondrial protein synthesis in yeast
Joan Stephenson	Duke University	J. Marmur	Prophage site of B. subtilis phage SP02
1970			
Denise Bostrom	Bennington College	R.F. Gesteland	Search for unusual RNA phages
Mark E. Furth	Harvard University	D. Zipser	Control of operon separation
Charles Gilbert	Amherst College	R. Crouch	Phage lambda DNA attachment in E. coli minicells
David Kaback	SUNY, Stony Brook	D. Zipser	Termination of mRNA synthesis
Ilan Kirsch	University of California	C. Mulder	Effect of E. coli B restricting enzyme on SV40 and polyoma DNA
Jeanne Margolskee	Harvard University	J. Cairns	Membrane attachment of DNA replication fork
David Margulies	Columbia University	R. Werner	Effect of gene 32 protein on rate of DNA replication in phage T4
Harvey Morrison	Cornell University	H. Westphal	Number of integrated SV40 genomes in transformed cells
Gerald Rubin	Massachusetts Institute of Technology	L. Crawford	Translation of mitochondrial DNA in a coupled system
Margaret Tucker	Wellesley College	J. Sambrook	Isolation of RNA polymerase from HeLa-mouse hybrids
1971			
Stephen Chung	University of Oregon	D. Zipser	Phage Mu rec. system
Mitchel Kanter	Duke University	D. Zipser	Phage Mu deletion map
Michael Kaplan	Harvard University	P. Greenaway	Tumor virus proteins
Ronald Koenig	Yale University	D. Zipser	Phage Mu deletion map
Randi Leavitt	Brooklyn College	D. Zipser	Mu-Lac hybrid proteins

CSHL Undergraduate Research Program Participants 1959 - 2017

URP name	University	Advisor	Research Project
Susan Leibenhaut	Massachusetts Institute of Technology	J. Sambrook	E. coli animal cell agglutination
Annamarie Rehn	Duke University	R.F. Gesteland	E. coli ribosome binding sites
John Ridge	University of Chicago	H. Delius	DNA renaturation with "gene 32" protein
Gerald Rubin	Massachusetts Institute of Technology	R.F. Gesteland	Lac operator nucleotide sequence
Jerome Zeldis	Brown University	D. Zipser	Orientation of Mu prophage
1972			
Janice Blustein	Johns Hopkins University	W. Keller	Separation of subunits of RNA-dependent DNA polymerase from avian myeloblastosis virus
David E. Burstein	Columbia University	E. Bade	Transcription of Mu-1 prophage
Hugh Cairns	Brown University	R. Pollack	Cell volume alternations in synchronized populations
Terrell Gibbs	Massachusetts Institute of Technology	D. Zipser	Computer simulation of nucleic acid
Helen Hollingsworth	Brown University	J. Bruenn	Isolation of mRNA degradation deficient mutants of E. coli
Ben Kim	Harvard University	P. Greenaway	Purine tract analysis of SV40 DNA
Mary M. Martin	Reed College	P. Greenaway	Pyrimidine tract analysis of SV40 DNA
T. Kevin Sweeney	Cornell University	H. Delius	Partial denaturation map of T5 DNA
Janis Townsend	Princeton University	C. Anderson	Characterization of tryptic peptides of actin
Jerome Zeldis	Brown University	R. Pollack	Fluctuation analysis of mutagen-induced reversion of transformed cells
1973			
James Breitmeyer	UC, Santa Cruz	R. Roberts	Purification and characterization of a new restriction endonuclease from H. aegyptius
Robert Heimer	Columbia University	P. Greenaway	ATP-dependent DNA methylases and endonucleases in chicken embryos
Helen Hollingsworth	Brown University	P. Sharp	Mapping of H. prairinfluenzae fragments of adenovirus 2 DNA
James F. Jackson	Princeton University	R.F. Gesteland	Isolation and sequencing of a tyrosine suppressor tRNA from yeast
Angus P. McIntyre	Harvard University	A.I. Bukhari	Study of an unusual growth factor-requiring mutant E. coli
Bernard H. Shen	Harvard University	P. Greenaway	Comparative study on DNA methylases in various rabbit tissues
T. Kevin Sweeney	Cornell University	H. Delius	Partial denaturation of phage T5 DNA
Nina F. Tabachnik	Yale University	R. Roberts	Purification and characterization of a second new restriction endonuclease from H. aegyptius
Paula Traktman	Radcliffe College	M. Howe/D. Zipser	Mutants of bacteriophage Mu-1 defective in lysogenization
Mariana Wolfner	Cornell University	R.F. Gesteland	In vitro protein synthesis in a wheat germ system using natural messages
1974			
Margaret Hightower	University of Alabama	R.F. Gesteland	Purification of yeast killer particles
Keith Mostov	University of Chicago	R. Roberts	A search for a mutant of the restriction endonuclease EcoRI
Harker Rhodes	Harvard University	B.N. Apte	In vivo and in vitro degradation of reinitiation polypeptides
Hilary Ronner	Barnard College	A.I. Bukhari	Assay of DNA-unwinding proteins from plasmid containing strains of E. coli
Howard Rutman	Harvard University	M. Botchan	Size determination of SV40 virion proteins from virus containing deleted DNA genomes
Vicky Valverde-Salas	Massachusetts Institute of Technology	A.I. Bukhari	Temperature-sensitive beta-galactosidase mutants of E. coli
Gary Weiss	Columbia University	R. Roberts	A search for new specific endonucleases
Mariana Wolfner	Cornell University	R.F. Gesteland	Analysis of yeast killer RNA and cell-free protein synthesis in yeast extracts
1975			
John Kent Chin	Yale University	T.R. Broker	Characterization of ultraviolet radiation-sensitive mutants of bacteriophage T4
Paul Epstein	Princeton University	R.F. Gesteland	The relationship between polarity suppression and internal reinitiation polypeptides in E. coli
Roslyn Feder	Brooklyn College	D. Botstein	Fractionation of suppressing tRNA from yeast cells
David Goldberg	Yale University	T. Maniatis	Direct DNA sequence analysis of bovine satellite DNA
Martin Jacobs	Duke University	B.N. Apte	Polypeptide splicing in vivo and in vitro
Wilson Miller	Princeton University	R.F. Gesteland	Cell-free protein synthesis in extracts from yeast
Julie Olson	Massachusetts Institute of Technology	R. Roberts	Screening bacterial strains for new restriction endonucleases
Vann Parker	Duke University	A.I. Bukhari	Genetic analysis of circular DNA molecules formed after prophage Mu induction
Howard Rutman	Harvard University	M. Botchan	Phosphorylation of SV40 virion proteins
Gary Struhl	Massachusetts Institute of Technology	G. Albrecht-Buehler	Two phases of locomotion in 3T3 mouse fibroblasts as revealed by haptotaxis phenomena
1976			
Mark D. Glen	University of Pennsylvania	M. Mathews	Nucleotide sequence of gene for adenovirus-associated RNA
Marion Gold	UC, Berkeley	C.G. Miller	In vitro studies of protein degradation in E. coli
Robert Gudor	UC, Berkeley	A.I. Bukhari	Interaction of genomes of bacteriophages Mu and P1 in E. coli
Francine Bryanne Hanberg	Yale University	R. Roberts	Screening bacterial strains for new restriction endonucleases
Nancy Harris	Yale University	J. Manley	Transcription of adenovirus DNA by wheat-germ RNA polymerases
Franklin G. Moser	Yale University	L.B. Chen	Distribution of cell-surface LETS protein in co-cultures of normal and transformed cells
Phyllis Moses	Johns Hopkins University	R. Kahmann	Hybrids made in vitro between pMB9 and C-terminal HindIII fragment of phage Mu
James Rhodes	Harvard University	K. Burrigde	Direct gel analysis of glycoproteins from cultured fibroblasts and epithelial cells
James M. Roberts	Amherst College	T. Broker/L. Chow	A cytoplasmic RNA transcript map of adenovirus 2 determined by electron microscopy of RNA:DNA hybrids

CSHL Undergraduate Research Program Participants 1959 - 2017

URP name	University	Advisor	Research Project
Beth Weinstein	Cornell University	J. Broach	Search for operon mutants in the galactose system of yeast
1977			
Vicki Lynn Brawley	UC, Berkeley	N. Harter	Characterization of adenovirus early protein
Carol Clewans	Reed College	A.I. Bukhari	Mapping of a new gene controlling the synthesis of an unusual growth factor in E. coli
Jason Fisherman	Yale University	R. Roberts	In situ assays for restriction endonucleases
Robert Hanich	Harvard University	R. Tjian	Big T and little t in deletion mutants of SV40
Iris Isabella Martinez	UC, Berkeley	D. Zipsper	The expression of cloned yeast DNA in E. coli minicells
Cynthia Sammis	Wells College	L. Chen	Studies on the synthesis of LETS protein
Forrest Spencer	Smith College	R. Kahmann	Microinjection into Xenopus oocytes
Eve Wolinsky	Massachusetts Institute of Technology	E. Cheng	Degradation of nonsense fragments of E. coli
Gary Yellen	Harvard University	J. Broach	2-D separation of DNA restriction fragments
1978			
Ezekiel J. Emanuel	Amherst College	J.B. Hicks	Isolation of mutations in mating-type locus of S. cerevisiae
Debra Sue Erdmann	University of Wisconsin	D.Y. Kwoh	Genetic recombination and complementation between Mu and cloned of Mu DNA
Scott Finley	SUNY, Stony Brook	N. Harter	Immunological identification of Ad2 early proteins
Judith Krieger	Harvard University	K. Burridge	Use of monoclonal antibodies to study cell surface antigens
James Lupski	New York University	A.I. Bukhari	Construction of plasmids containing ends of prophage Mu DNA
Kenneth McElwain	Wesleyan University	T.R. Broker	Identification of recombinant plasmids with Tn5 inserted in cloned phage Mu DNA
Jeremy Nathans	Massachusetts Institute of Technology	R. Roberts	Modification of Sanger's chain termination DNA sequencing method in Ad2 DNA
Steven Robinow	UC, Berkeley	R. Tjian	Enzymatic and DNA binding properties of the SV40 A-gene product
Susan Rolseth	University of Connecticut	Y.-S. Cheng	Characterization of E. coli K12 mutants defective in protease III
Adam Schulman	University of Chicago	G. Albrecht-Buehler	The effect of cold shocks on mirror-symmetrical migration of sister 3T3 cells
Michael Stern	Stanford University	J.R. Broach	Cloning SUP61, a yeast serine inserting, recessive-lethal, nonsense-suppressor gene
1979			
Martha S. Cyert	Harvard University	B.S. Zain	Nucleotide sequence analysis of the REC/INT sites of Ad2+ND1-dp2 viral DNA
Samuel Kunes	University of Oregon	G.P. Thomas	Studies on the control of adenovirus gene expression
Joachim Li	University of Chicago	A.I. Bukhari	Sequencing of products left after excision of Mu DNA from the lacZ gene: adaptation of Sanger's dideoxy-method and the M13 phage system
Leona Ling	UC, Berkeley	Y. Gluzman	Sequence determination of the junctions between Ad2 and SV40 genomes in the Ad2-SV40 (HEY and LEY) hybrids
Suzanne Mansour	Radcliffe College	M. Mathews	Selection of adenovirus mRNAs using separated strands of viral DNA fragments
Mark Minie	Wesleyan University	K. Burridge	Attempt to isolate mouse lymphocyte IgG "caps" or "patches"
Timothy Mitchison	Oxford University	M. Botchan	SV40 recombination with chromosomal DNA
David Schriber	Amherst College	M. Wigler	Cloning and characterization of deletion mutants of the HSV-1 thymidine kinase gene
Brook Soltvedt	Wellesley College	Y.-S. Cheng	Restriction endonuclease analysis of the cloned lacZ carrying an ochre mutation
Elizabeth Spatola	Wheaton College	J.B. Hicks	Isolation of mutations in mating-type locus of S. cerevisiae
Ina Sporecke	Smith College	D.Y. Kwoh	Nitrous acid mutagenesis of recombinant plasmids carrying the Mu gin gene
1980			
Alexander Baxter	Haverford College	D. Kurtz	Characterization of the rat alpha 2μ globulin
Chris Corliss	UC, Berkeley	R. Roberts	Dideoxy sequencing of adenovirus 2 DNA using HindIII restriction fragments as primers
Andy Ellington	Michigan State University	J. Lewis	In vitro mutagenesis of Ad2 as a means of examining the significance of poly (A) tailing of mRNA
Deborah Gibson	Rensselaer Polytechnic Institute	J. Garrels	2-D gel electrophoresis of human fibroblast proteins: in quest of the CF gene
Felicia Hendrickson	Harvard University	J. Garrels	Mitochondrial protein identification on 2-D gels
Thomas Laton	LeMoyne College	J. Smart	Determination of the monoclonal antibody binding site of SV40 large T antigen
Leona Ling	UC, Berkeley	Y. Gluzman	Sequencing the junctions of Ad2-SV40-defective hybrids
Elizabeth McFarland	Northwestern University	D. Zipsper	Sequence analysis of deletion and insertion mutations of the cloned HSV-1 thymidine kinase gene
Allen Oser	Brown University	A.I. Bukhari	Restriction enzyme mapping of Mu phage DNA and use of various methods to make plasmids (pSC101 and pBR322) containing Mu wild-type repressor gene
Barry Rosen	Wesleyan University	T. Broker	Nucleotide sequence evolution in adenovirus: determination of the sequence of gene
Eric Schulze	UC, Berkeley	S. Blose	Purification and characterization of the midbody of dividing HeLa cells
1981			
Kristen Clarke	University of Pennsylvania	R. Roberts	M13 as a chimeric protein cloning system
Lindsey Criswell	University of California	B. Stillman	Characterization of temperature-sensitive mutants of adenovirus 2
Lisa Haas	University of California	J. Hicks	Mapping of cloned pieces of yeast DNA which complement mutations in positive and negative regulatory elements for unexpressed mating-type loci
Jonathan Miller	Yale University	J. Stringer	Viral RNA levels in rat cells transformed by an SV40 T antigen mutant
Nancy Mills	Harvard University	D. Zipsper	The promoter region of herpes virus thymidine kinase gene

CSHL Undergraduate Research Program Participants 1959 - 2017

URP name	University	Advisor	Research Project
Roger Mosesson	Columbia College	R. Harshey	Construction of Mini-Mu plasmid vectors that can be used for cloning
Mirjana Nesin	University of Belgrade	M. Wigler	Searching for human and murine transposons
Craig Okada	University of Utah	F. Heffron	Construction of A plasmid to study deletions associated with transposons
Ron Sapolsky	University of Rochester	J. Smart	Tryptic peptide analysis of proteins from adenovirus serotype 2 early regions
Eric Schulze	University of California	S. Blose	The midbody: a functional and molecular perspective
Nick Theodorakis	University of Washington	S. Hughes	Sequencing the chicken β -actin gene
1982			
Tania Ann Baker	University of Wisconsin	A.I. Bukhari	Cloning the Mu A gene
David Campanelli	Wesleyan University	T. Broker	Gene expression of human papilloma virus type 1
Brad Cookson	University of Utah	M. Wigler	Construction of a transforming gene under control of a metallothionein promoter
Andrew Gray	Princeton University	P. Thomas	Genomic clones of human heat shock genes
Jill Heemskerck	UC, Berkeley	M. So	DNA rearrangement and pathogenicity in <i>N. gonorrhoeae</i>
Kenneth Howard	Cambridge University	J. Fiddes	Aspects of expression of the multigene family for the beta subunit of human chorionic gonadotropin
Eva Nozik	University of Colorado	D. Kurtz	Hormones and methylation patterns in gene expression
Phillip Starr	Princeton University	T. Gingeras	Cloning bacterial restriction/modification genes
Nick Theodorakis	University of Washington	J. Feramisco	Analysis of structural proteins in non-muscle cells
Peter Weinstein	University of Michigan	L. Silver	Mapping of an MMTV provirus on mouse chromosome 7
1983			
Marvin Appel	Harvard University	F. Daldal	Growth of anaerobes under normal atmospheric conditions in medium reduced by
Michael Cahn	Dartmouth College	P. Thomas	Sequence analysis of human stress protein genes
Brad Cookson	University of Utah	M. Wigler	Analysis of mutations altering expression of H-ras-1 genes
Robert Dudley	Duke University	R. McKay	The generation of antibodies to neural gene products by means of cDNA clones
Lillie Hsu	University of Michigan	A.I. Bukhari	Vectors for shotgun cloning of bacterial genes without restriction enzymes
Kyu-Ho Lee	Massachusetts Institute of Technology	F. Tamanoi	Use of M13 to express H-ras-1 T24 bladder carcinoma p21 protein in <i>E. coli</i>
Ramona Morfeld	Wheaton College	J. Hicks	AntiMar: A disrupter of the negative regulation of the silent mating-type cassettes in <i>S. cerevisiae</i>
Andrew Nathanson	University of Pennsylvania	R. McKay	Molecular diversity of the embryonic rat nervous system
Michael Schor	Cornell University	A. Klar	Search for a site-specific endonuclease gene in <i>S. pombe</i>
Thomas Smart	Cornell University	M. Malmberg	Cloning of the <i>N. tabacum</i> nitrate reductase gene through Insertional mutagenesis of a modified T-DNA fragment of <i>A. tumefaciens</i>
Laurie Smith	Princeton University	A.I. Bukhari	Tn5 mutagenesis of the <i>gin</i> and <i>mom</i> genes of Mu
1984			
Mark Alfenito	Cornell University	S. Dellaporta	Genetic and molecular study of maize controlling elements
Catherine Chen	Massachusetts Institute of Technology	B. Stillman	Analysis of the <i>deg</i> phenotype associated with mutations in the gene encoding the adenovirus E1B 19K tumor antigen
Shinta Cheng	Yale University	F. Daldal	Molecular genetics of cytochrome C2 of <i>R. capsulata</i>
Susan Euling	Columbia University	D. Kurtz	Determination of tissue-specific transcription of alpha 2 μ globulin
William Howell	University of Wisconsin	P. Scolnik	Characterization of DNA ends of the gene transfer agent <i>R. capsulata</i>
Phyllis Kristal	Massachusetts Institute of Technology	L. Silver	Developmental analysis of lethal mutations of mouse chromosome 17
Mark Montgomery	Princeton University	J. Lewis	Transcription studies with the cell cycle-regulated Chinese hamster thymidine kinase gene
Ramona Morfeld	Wheaton College	J. Hicks	Investigation of a transformation system in maize
Jon Rubin	Harvard University	D. Helfman	Isolation and characterization of cDNA clones encoding non-muscle tropomyosin
David Southern	University of Glasgow	R. Sadaie	Proliferating cell nuclear antigen: the need for research
1985			
Mark Alfenito	Cornell University	S. Dellaporta	Studies of a controlling element and complex locus in maize
Pedram Argani	Princeton University	Y. Gluzman	Expression of SV40 T antigen by E1-deleted adenovirus-5 vectors
Todd Brown	Pittsburg State University	D. Youvan	Isolation of the reaction center of <i>R. capsulata</i> and development of transformation protocols
Gabrielle Costello	Harvard University	R. Franza	Cell cycle study of the fission yeast <i>S. pombe</i>
Lisa Griffin	University of Notre Dame	D. Kurtz	Isolation of a transcriptional factor in the hormonal control of alpha2 μ globulin
Nicholas Hanchak	University of Scranton	D. Hanahan	Transformation efficiency in nucleoside transport mutants of <i>E. coli</i> establishment of beta cell lines from transgenic mice
Stuart MacNeill	University of Glasgow	B. Stillman	Simian virus 40 replication in vitro
Susan McEvoy	University of Wisconsin	R. Roberts	Establishing E1A-producing cell lines and analysis of restriction endonucleases
Andrew Mirhej	Columbia University	C. Slaughter	The use of hydrophobic interaction chromatography as a new method for the typing of ALP
Kevin Murphy	Massachusetts Institute of Technology	J. Hicks	Transformation of <i>C. reinhardtii</i>
Robert Paul Ray	UC, Berkeley	R. Guggenheimer	SV40 replication in vitro
Geraldine Seydoux	University of Maine	D. Beach	Genetic suppressors of the genes <i>ran1</i> and <i>mei3</i> in <i>S. pombe</i>
Alyssa Shepard	UC, Riverside	W. Herr	Cell-type specificities of SV40 enhancer elements
Henry Stapp	Hampshire College	P. Scolnik	Location of carotenoid D gene product in <i>R. capsulata</i>

CSHL Undergraduate Research Program Participants 1959 - 2017

URP name	University	Advisor	Research Project
Sheila Wong	Yale University	F. Daldal	Cytochromes and the photosynthetic pathway of <i>R. capsulata</i>
1986			
Pedram Argani	Princeton University	Y. Gluzman	Origin-specific binding of SV40 large T antigen
Sean Burgess	University of Colorado	W. Herr	Late transcription in SV40
Nina Caplin	Duke University	B. Welch	Purification of the major mammalian glucose-regulated proteins
Mark Eisner	Stanford University	S. Powers	Localization and characterization of supC: A suppressor of the heat shock sensitivity phenotype induced by the Ras2val19 mutation in yeast
Irene Griff	Massachusetts Institute of Technology	F. Daldal	Isolation and identification of stigmatellin-resistant mutations in the pet operon in <i>R. capsulata</i>
Martin Horvath	Brown University	B. Stillman	Characterizing the ABF1 binding site of ARS1 in vivo
Brad Johnson	Yale University	A. Bhagwat/R. Robert	Sequencing the EcoRII endonuclease gene
Ethel Johnson	Vanderbilt University	D. Helfman	Sequence determination and analysis of introns in rat embryonic fibroblast tropomyosin 1
Abhijeet Lele	Jesus College	E. Harlow	Identification of cellular mediators of E1A action by random mutagenesis of E1A-transformed cells
William Moomaw	SUNY, Albany	S. Dellaporta	Identification of Ac2 elements in the DNA of maize stocks showing responder element activity
Nicholas Morrissey	University of Rochester	A. Rice	Characteristics of double-stranded RNA required for the activation of the protein kinase, DAI
Roya Namvar	New York University	D. Youvan	Oligonucleotide-directed site-specific mutagenesis of the light-harvesting I antenna genes of <i>R. capsulata</i>
Scott Panzer	Harvard University	D. Hanahan	Expression patterns of papilloma viruses in transgenic mice
Henry Stapp	Hampshire College	P. Scolnik	Study of in vitro carotenoid biosynthesis and in vitro assembly of functional
Wendy Weiher	University of Pennsylvania	R. Cone	Efficiency of oncogene transfection into E1A-immortalized rat cells
1987			
Struan Coleman	Harvard University	D. Marshak	Phosphorylation by casein kinase II
Michelle Dziejman	University of Rochester	W. Welch	The mammalian heat shock response
Malek Faham	University of Maryland	F. Daldal	Genetic analysis of the structure of the quinol oxidization site of the cytochrome bc1 complex
Lisa Gloss	Michigan State University	W. Herr	Transcriptional control in SV40
Joshua Gordon	Washington University	L. Field	Construction of an albumin-ANF fusion gene
Diane Harvey	Cornell University	E. White	Expression of the adenovirus E1B gene products
Adam Kaplin	Yale University	D. Spector	Preliminary investigations into the functional significance of the Sm antigen distribution pattern in situ
Elena Levine	Yale University	M. Quinlan	The effect of adenovirus E1A on the SV40 enhancer in CV-1 cells
Rong Li	Yale University	D. Frendewey	Pre-mRNA splicing in <i>S. pombe</i>
John Logsdon	Iowa State University	S. Briggs	Gene expression in response to a fungal toxin in maize
Tobe Mellman	Cornell University	D. Beach	Isolating suppressors of a cdc13 mutation in <i>S. pombe</i>
Andrew Millar	Cambridge University	B. Stillman	In vitro mutagenesis of the ARS1 replication element of yeast
Alice Paquette	Massachusetts Institute of Technology	M. Gilman	Investigation of c-fos regulation
Pam Reinagal	Carnegie Mellon University	N. Hernandez	Small nuclear RNA U1 3' end formation
Barbara Sampson	Princeton University	A. Klar	Mating type switching in <i>S. pombe</i>
Elizabeth Sowell	College of Charleston	V. Sundaresan	Mapping of the Mu transposon in the bronze gene
Fiona Stewart	University of Glasgow	B. Moran	Characterization of conserved regions of adenovirus E1A gene
Jonathan Tropp	Harvard University	J. Pflugrath	Purification of yeast Ras2
Johannes Walter	UC, Berkeley	J. Anderson	DNA-protein interactions at the molecular level
1988			
Jennifer Brown	Yale University	K. Arndt	Cloning a transcription factor of the yeast HIS4 gene by expression library screening
Franco Carlotti	Cambridge University	A. Rice	Human immunodeficiency virus tat protein function
Emily Chan	Harvard/Radcliff	R. Roberts	mRNA splicing extracts from mammalian tissues
Emad Gharavi	City College of New York	M. Mathews	Cloning of PCNA by screening rat and human genomic libraries in lambda phage and isolation of genomic DNA fragments
Lisa Gloss	Michigan State University	R. Franza	Expression of three eukaryotic nuclear proteins
Daniel Grief	Stanford University	J. Anderson	Purification of the myc oncoprotein
Ulrich Grossniklaus	University of Basel	N. Hernandez	Transactivation of the human U2 small nuclear RNA promoter
Beth Hance	Moravian College	E. Moran	Activation of cellular gene expression by the adenovirus E1A gene products
Junjiro Horiuchi	Stanford University	B. Stillman	Isolation of putative human chromosomal origins of DNA T. tsurimoto replication
Seth Karp	Harvard University	D. Beach	Cell cycle regulation
Chris Leptak	Yale University	D. Frendewey	<i>S. pombe</i> mRNA splicing in vitro
