

Science for your ears

It's a whole new way to experience science stories from CSHL. Introducing our first fully-produced podcast, *Base Pairs*. In episode one, hear how an ordinary kitchen blender helped reveal DNA's importance, and how a scientist and a mother worked together to identify her sons' disorder for the first time.

Basic research needs your support

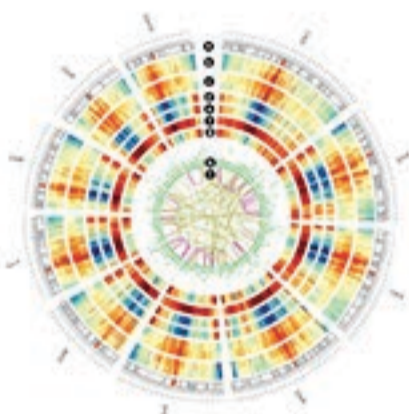

Discoveries made through basic research drive medical progress that saves lives, yet federal support for basic research is declining. Help put scientific research and innovation in the national conversation this election season by joining CSHL and Research!America in the Campaign for Cures.

Surprising diversity hidden within corn

Corn may be one of the most well-studied plants around, but it's managed to keep a big secret. Its genome can generate amazing diversity that could provide a path to varieties that are better-equipped to face climate change and other challenges.
