Biologists 'go rogue'

A simple click on a computer screen was all it took to make a rebel out of Carol Greider, Nobel laureate and former CSHL researcher, according to *The New York Times*. The act in question? Publishing her new discoveries instantly on a publicly accessible website called bioRxiv, started by CSHL's John Inglis and Richard Sever.

Mover, shaker, science history wrangler

Without Library & Archives Director Mila Pollock's incredible work, pieces of CSHL history captured through oral interviews and other projects would have been lost. In this 125th anniversary year, CSHL is especially proud of its history and its star "science history wrangler," just named one of *Library Journal's* 2016 Movers & Shakers. [More](#)

A summer of science adventures

Sleuthing for species using DNA clues and silencing genomes using Nobel Prize-winning technology are just two of many scientific journeys that students grades 6 through 12 will embark on this summer. Parents are now invited to sign their students up for the DNA Learning Center's summer science camps. [More](#)
