Cold Spring Harbor Laboratory (CSHL) will celebrate its twelfth Double Helix Medals on Wednesday, November 15, to honor Tom Brokaw and Helen and Charles Dolan. They will join the ranks of past Double Helix Medal recipients including Muhammad Ali, Michael J. Fox, Kareem Abdul-Jabbar, Evelyn Lauder, Katie Couric, and Alan Alda, all of whom have been recognized for positively impacting human health by raising awareness and funds for biomedical research. This year's dinner will be held once again at the American Museum of Natural History.

Through his personal struggle with multiple myeloma and with the power of his respected voice, Tom Brokaw has importantly brought attention to this disease, and it has undoubtedly saved the lives of others. Mr. Brokaw is a well-respected and trusted figure in U.S. broadcast journalism, and is best known as the anchor and managing editor of NBC Nightly News from 1982 to 2004. Helen and Charles Dolan have raised a great deal of awareness and urgently needed funding for pancreatic cancer research through the Lustgarten Foundation. They have also impacted human health through the Dolan Family Foundation by facilitating biomedical research and education.

Founded in 1890, Cold Spring Harbor Laboratory is considered the birthplace of molecular biology. Home to eight Nobel Prize winners, scientists are conducting cutting-edge genetics research related to numerous diseases including cancer, autism, schizophrenia, Parkinson's disease, Alzheimer's disease and depression.

Double Helix Medals dinner participation levels are outlined on the enclosed form. Your gift will be leveraged by a generous friend who will match the proceeds of the evening. A timely response to our sponsorship request will allow CSHL to acknowledge your participation on the invitation. Thank you for your support of CSHL's genetic disease research programs.

With sincere gratitude, Dinner Chairmen:
